1.1. PipelineOverhead

1.1.1. Attributes

Chapter 2. Pipeline Overhead

<Definition>

A string of interconnected pipes, supported by pylons and passing over or nearby navigable waters, used for the transport of matter, nowadays mainly oil or gas.

2.2. CardinalBeacon

2.2.1. Attributes

Chapter 3. Cardinal Beacon

<Definition>

A cardinal beacon is used in conjunction with the compass to indicate where the mariner may find the best navigable water. It is placed in one of the four quadrants (North, East, South and West), bounded by inter-cardinal bearings from the point marked.
